

OD JAJČECA

FROM EGGS

DO ŽABE

TO FROGS

SKUPINA LUNICE

Vzgojiteljici Daniela Dobnik
in Mia Želj

Najprej smo si ogledali kratek film
o razvoju žabe.

We first watched a short film about the
development of the frog.

Imeli smo srečo, da smo dobili mrest, ki smo si ga dali v prozorno posodo, da smo lahko opazovali jajčeca. Enkrat na teden smo si šli po vodo do mlako in jo jajčecem zamenjali.

We were lucky to get a spawn, which we put in a container so we could observe the eggs. Once a week we went for water to the puddle and replaced it with eggs.

Izdelali smo si tudi svoje žabje mlake iz kartona in papirja.

We also made our own frog puddle out of cardboard and paper.

PRIJETEN OGLED POSNETKA.

PLEASANT VIEW OF THE VIDEO.
