

Lego dan v 3.razredih

Erasmus+

BTL
Better Teaching
and Learning

As for many years, we were also visited this year by Mr. Rainer Blasius from Germany. Every year, he delights the students with various activities. This year, in the third grade, he brought Lego construction materials, which the students assembled and programmed with the help of the WeDo, Boost and Powered Up applications. The students were very active and creative. They also had an exceptional opportunity to develop communication in English and German. We were thrilled. We look forward to meeting you again.
